IPHONE AND ANDROID SETUP GUIDES

Put Undivided on Your Home Screen

One tap to help, right where your phone habit starts.

STEP 1 · START HERE

Open myundividedapp.com in Safari (iPhone) or Chrome (Android), then add it to your Home Screen.

Putting Undivided on your home screen makes help one tap away. It also helps your phone keep your saved progress.

iPhone (Safari)

1. Open **myundividedapp.com** in Safari.
2. Tap the **Share** button (square with an arrow).
3. Tap **Add to Home Screen**, then **Add**.

Android (Chrome)

1. Open **myundividedapp.com** in Chrome.
2. Tap the ⋮ menu.
3. Tap **Add to Home screen** or **Install app**.

Make it work for you

- Put the Undivided icon where your most-used app used to be, and move that app to your last screen.
- Instant Reset, the 5-Day Reset and resources you've opened work even without a connection.

Undivided · myundividedapp.com · Free to print and share for personal, non-commercial use.
